

APB

MINING PERFORMANCE

APB produce buckets for mining excavators and wheel loaders up to **50m³**.

Rhino Series are products specially designed and manufactured to resist high abrasive applications.

Our buckets are carefully built to get the best wear protection result. Design, materials and manufacturing process meet the highest quality standards, thus resulting in **products that always exceed customer's expectations.**

If you want to improve the productivity ratio in your company, do not hesitate to contact us.
