

## MINING PERFORMANCE

**APB** supplies truck-mounted Water Tanks for the mining and earthmoving industries.

**APB** builds water tanks to be mounted on any dump truck manufacturer.

Our experience on the field ensures, besides a reliable and simple technology, an optimal spray and water consumption.

### Materials quality

Tank material and anchoring to the truck in S690Q. Piping for sprinklers, water pump and can on in Stainless Steel or S355. The water tanks are treated with a Sa2 ½ shot blasting and an internal Zinc-rich primer, which provides a better adherence to the sheet metal.

### Material treatment and inspection

The water tanks are treated with a Sa2 ½ shot blasting and an internal Zinc-rich primer, which provides a better adherence to the sheet metal. On the other hand, all welds are inspected with magnetic particles or penetrating liquids to guarantee water tightness.

### Excellent balance

Fully wall baffled system for reduced liquid surge and improved load stability during transit. Hydraulic pumps in both carbon steel and stainless steel to withstand corrosion in certain types of water.
